# PHASE I ENVIRONMENTAL SITE ASSESSMENT AUTO EXPRESS CAR WASH 220 SOUTH HALL ROAD ALCOA, TENNESSEE

S&ME Project No. 1434-09-245

Prepared for:

Furrow Auction Company 1022 Elm Street Knoxville, Tennessee 37921

1413 Topside Road. Louisville, Tennessee 37777

August 9, 2009

August 9, 2009

Furrow Auction Company 1022 Elm Street Knoxville, Tennessee 37921

Attention:

Mr. Rob Strickland

Reference:

Report of Phase I Environmental Site Assessment

Auto Express Car Wash 220 South Hall Road Alcoa, Tennessee

S&ME Project No. 1434-09-245

Dear Mr. Strickland:

S&ME, Inc. has completed the Phase I Environmental Site Assessment for the abovereferenced property. The attached report presents the results of S&ME's assessment of the site, which was performed in accordance with ASTM E 1527-05 and S&ME Proposal No. 3409386 dated July 27, 2009. If we can be of any further assistance, please call us at 865-970-0003.

Sincerely,

S&ME, Inc.

Timothy S. Schalk

Staff Scientist

Eric M. Solt, P.G. Senior Reviewer

## **SUMMARY**

S&ME, Inc. (S&ME) has performed a Phase I Environmental Site Assessment (ESA) for the Auto Express Car Wash facility in Alcoa, Tennessee. This Phase I ESA was authorized by Mr. Rob Strickland of Furrow Auction Company. The following summary is intended as an overview of the Phase I ESA, and does not include the complete findings and opinions of the full report.

The subject property currently consists of approximately one acre of land at 220 South Hall Road. A vacant car wash building is located on the southwest portion of the property. The northeast portion of the property contains asphalt paved parking for the car wash and adjoining Kroger food store. The car wash building is constructed of concrete block and contains a customer service area, office, and wash bay. A trench drain which flows into the sewer runs the length of the wash bay. Hydraulic and soap dispensing equipment is located in a room on the southeast side of the building. Minor staining of the concrete floor in this room was observed. The staining is considered a *de minimis* condition which would not be subject to regulatory actions. No hazardous materials were observed in the building or on the exterior of the property.

According to historical information, interviews, and regulatory records reviewed, the subject property has been a car wash for approximately 20 years. Prior to that time, the property was used as a parking lot and as residential property. A review of regulatory information identified thirteen off-site facilities. The adjacent Kroger food store is listed as a leaking underground storage tank (LUST) facility. A review of the regulatory files for the Kroger facility did not identify any releases to the environment. The remaining twelve off-site facilities are greater than 1,700 feet from the subject property. No off-site facilities are considered recognized environmental conditions (RECs) in connection with the subject property.

Based on the results of this Phase I ESA, S&ME identified no evidence of RECs in connection with the subject property.

## 1. INTRODUCTION

S&ME, Inc. (S&ME) conducted a Phase I ESA for the approximate one acre subject site located at 220 South Hall Road in Alcoa, Tennessee. The ESA was conducted using the American Society for Testing and Materials (ASTM) E 1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and in accordance with S&ME, Inc. Proposal No. 3409386 dated July 27, 2009.

## 1.1 Purpose

The Phase I ESA was prepared for Furrow Auction Company. The purpose of the ESA is to identify, pursuant to ASTM E 1527-05, recognized environmental conditions (RECs) in connection with the subject property.

ASTM defines the term *recognized environmental condition* (REC) as the presence or likely presence of hazardous substances or petroleum products on the property under conditions that indicate an existing release, past release, or a material threat of a release of hazardous substances or petroleum products into the structures on the property or into the ground, groundwater, or surface water of the property. The term does not included *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies.

# 1.2 Detailed Scope of Services

### 1.2.1 ASTM E 1527-05

S&ME's approach to performing this Environmental Site Assessment consisted of four major tasks in accordance with ASTM Standard Practice E 1527-05. The tasks include 1) a review of the public record; 2) a site reconnaissance; 3) interviews; and 4) preparation of a report. Each of these four tasks is discussed in more detail below.

<u>Task 1</u> - A review of reasonably ascertainable public records for the site and the immediate vicinity was conducted. This review was performed to characterize environmental features of the site and to identify past and present land use activities, on or in the vicinity of the site, which may indicate a potential for *recognized environmental conditions*. The review of the reasonable ascertainable public records included:

- 1. Examination of federal, state, tribal and reasonably ascertainable local public records for the site and immediate vicinity.
- 2. Examination of one or more of the following standard sources: aerial photographs, fire insurance maps, tax files, building department records, zoning/land use records, street directories and topographic maps of the site and vicinity for evidence suggesting past uses that might have involved hazardous substances or petroleum products.

<u>Task 2</u> - A site reconnaissance was performed to identify visual signs of past or existing contamination on or adjacent to the site. This reconnaissance was also performed to evaluate evidence found in our public record review that might indicate activities resulting in hazardous substances or petroleum products being used or deposited on the site. The site reconnaissance included the following activities:

- 1. A reconnaissance of the site and adjacent properties was performed to look for evidence of current and past property uses, signs of spills, stressed vegetation, buried waste, underground or above ground storage tanks, subsidence, transformers, or unusual soil discoloration which may indicate the possible presence of contaminants on the properties. Photographs are provided to document these conditions.
- 2. The exterior reconnaissance involved a viewing of the periphery of the property and a walk-through of accessible areas of the site interior including the exterior of on-site structures.
- 3. The interior reconnaissance involved a walk-through of the interior of all accessible structures.

<u>Task 3</u> – Interviews with past and present property owners, operators and occupants as well as with appropriate local officials were conducted to consider any local knowledge of hazardous substances or petroleum products on the property or on adjacent properties.

Task 4 - Report preparation and review.

# 1.2.2 Exclusions from and Additions to Scope of Services

Unless specifically authorized as an addition to the Phase I ESA work scope, the assessment did not include any assessment of environmental conditions not specifically included in the ASTM E 1527-05 standard including, but not limited to sampling of materials (i.e., soil, surface water, groundwater or air), or the assessment of business risk issues such as wetlands, lead in drinking water, fungi or bacteria in on-site buildings, regulatory compliance, cultural/historic risks, industrial hygiene, health/safety, ecological resources, endangered species, indoor air quality (including an evaluation of vapor intrusion), radon or high voltage power lines.

# 1.3 Significant Assumptions

A significant assumption used in evaluating potential impacts to the subject property of nearby, off-site incidents was that the slope of the water table under static conditions (no pumping interference) often approximates the land surface topography. Thus, the movement of groundwater is assumed to be in approximately the same direction as the dip of the topographic slope.

## 1.4 Limitations of the Assessment

The findings of this report are applicable and representative of conditions encountered at the subject property at the time of this evaluation, and may not represent conditions at a

later date. The review of public records was limited to that information which was available to S&ME at the time this report was prepared. Interviews with local and state government authorities were limited to those people whom S&ME were able to contact during the preparation of this report. All information was derived from practically reviewable, readily available sources in compliance with the standards set forth by the American Society for Testing and Materials (ASTM) Standard Practice E 1527-05 Phase I Environmental Site Assessment and Reports Requirements (Revised February 3, 2006 – 4 pages) and Supplement (Revised May 22, 2000 - 6 pages). Although this report satisfies the ASTM E 1527-05 Standard Practice, these results are not a guarantee or warranty that no environmental conditions exist or that the property is free from all contamination. The ASTM Standard was developed to outline *appropriate inquiry* into the assessment of real property and therein "reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions*."

The opinions presented in this report are based on findings derived from a site reconnaissance, a review of specified regulatory records and historical sources, and comments made by interviewees. Generally, information obtained from public records and from interviews is reliable. However, S&ME cannot warrant or guarantee that information provided is complete or accurate. In the event responses requested by S&ME from public agencies are provided to S&ME following the submittal of our report, they will be forwarded to the client in the form received for evaluation by the client.

A limitation was that the history of the property was not documented within approximately five-year intervals because standard historical sources such as aerial photographs, city directories, historical topographic maps and Sanborn fire insurance maps were either not available or not observed at five year intervals.

# 1.5 Special Terms and Conditions

This Phase I ESA was conducted in accordance with S&ME Proposal No. 3409386, dated July 27, 2009. S&ME Agreement for Services (Form AS-071) is incorporated into the proposal, a copy of which is included in Appendix VI.

#### 1.6 User Reliance

The resulting report is provided for the sole use of Furrow Auction Company. Use of this report by any third parties will be at such party's sole risk except when granted under written permission by S&ME. Any such authorized use or reliance by third parties will be subject to the same Agreement, under which the work was conducted for Furrow Auction Company.

The additional party's use and reliance on the report will be subject to the same rights, obligations, and limitations imposed on Furrow Auction Company by our Agreement. However, the <u>total</u> liability of S&ME to all parties of the Phase I ESA shall be limited to the remedies and amounts as provided in the Agreement as a single contract. The additional party's use and reliance on the report shall signify the additional party's agreement to be bound by the proposal and contract that make up the Agreement between S&ME and Furrow Auction Company.

According to standards set forth by ASTM E 1527-05, components of the Phase I ESA will expire in 180 days from the date of completion of that component and may therefore require updating if a property transaction exceeds this time period. The following table lists the dates of completion for pertinent components:

Component	Date of Completion
Environmental Database Search	July 31, 2009
Site Reconnaissance	August 3, 2009
Interviews	August 5, 2009
Environmental Lien Search	Not Provided

#### 2. SITE DESCRIPTION

## 2.1 Site Location

The subject property consists of one parcel located at 220 South Hall Road in Alcoa, Tennessee. The property is identified on the Blount County Tax Map as Parcel 46M, Group A, Parcel 26.01. The location of the subject site is depicted on the figures found in Appendix I.

# 2.2 Site and Vicinity Characteristics

The subject property consists of approximately one acre in an area characterized by retail businesses and residential properties. Retail businesses are located north, south, and west of the property. Residential properties are located east of the property. The overall slope of the property is down to the west.

# 2.3 Current Uses of the Property

The subject property is currently occupied by an Auto Express Car Wash facility.

# 2.4 Site Improvements (Descriptions of Roads, Other Improvements on the Site)

The subject property is improved with a concrete block car wash building located on the northeast portion of the property. The majority of the property is asphalt paved.

## 2.5 Current Use of Adjoining Properties

An off-site visual reconnaissance of the immediately adjacent properties was conducted on June 3, 2009. The off-site reconnaissance was limited to properties that were visible from the perimeter of the site, as well as areas that were readily accessible by public roads near the subject site. Descriptions of the properties adjacent to the subject site are outlined as follows:

#### Northwest

A Burger King adjoins the subject property to the northwest with Lindsey Street beyond. A shopping center containing a Big Lots store is located on the northwest side of Lindsey Street with additional retail businesses further northwest. **Northeast** South Hall Road is immediately northeast of the subject property.

An Executive Lodge motel and Save A Lot food store are located on the northeast side of South Hall Road with residential properties

beyond.

**Southeast** A shopping center containing a Kroger food store adjoins the

subject property to the southeast. Additional retail businesses are

located further southeast along South Hall Road

**Southwest** South Rankin Road adjoins the property to the southwest.

Residential properties are located on the southwest side of South

Rankin Road and beyond.

### 3. USER PROVIDED INFORMATION

#### 3.1 Title Records

A chain-of-title report for the subject property was not provided to S&ME by the User.

# 3.2 Environmental Liens or Activity and Use Limitations

Information pertaining to evidence of environmental liens and activity and use limitations was not provided by the User.

## 3.3 Specialized Knowledge

No specialized knowledge or experience that is material to recognized environmental conditions in connection with the property has been provided to S&ME by the User during this assessment.

## 3.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information has not been provided to S&ME by the User.

## 3.5 Property Purchase Price versus Fair Market Value

S&ME was not informed by the User whether the purchase price of the property reflects the fair market value.

# 3.6 Owner, Property Manager and Occupant Information

According to the Blount County Property Assessor's office, the subject property is currently owned and managed by Ms. Susan King. The building is currently occupied by Auto Express Car Wash.

# 3.7 Reason for Performing the Phase I ESA

It is our understanding that this report is for the sole purpose of providing an environmental evaluation of the site in order to conclude a real estate transaction. S&ME also assumes that the purpose of this assessment is to perform all appropriate inquiries prior to the purchase of the property to satisfy one requirement of the CERCLIS Landowner Liability Protections (LLPs) and to assist the purchaser in qualifying for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability.

#### 3.8 Other

No other information was provided to S&ME by the User.

#### 4. RECORDS REVIEW

### 4.1 Standard Environmental Record Sources

S&ME contracted Environmental Data Resources (EDR) to review available federal and state environmental records regarding the property and surrounding area within one mile of the site. EDR contacts regulatory agencies on a periodic basis to update identified databases. The EDR database report is contained in Appendix II. S&ME reviewed regulatory agency files for identified facilities which are located within the search radii as established by ASTM E 1527-05. The extent of the search radii vary according to the activities and/or materials produced at each facility. The Phase I ESA search radii are listed below.

# REGULATORY DATABASE SEARCH ENVIRONMENTAL DATA RESOURCES

UST	0.25 mile	2
Spills	TP	0

TP = Target Property

The subject property was not identified on the databases reviewed. Eleven off-site facilities were identified within the ASTM minimum search distances. Ten of these facilities are located more than 1,700 feet from the subject property. Given their distances from the subject property, these ten off-site facilities are not considered RECs in connection with the subject property and their regulatory files were not reviewed. One off-site facility, Kroger, is adjacent to the subject property and classified as a LUST, UST, and HIST UST facility. Regulatory records for Kroger were reviewed at the Tennessee Department of Environment and Conservation (TDEC) Division of Underground Storage Tanks (DUST) office in Knoxville, Tennessee.

Kroger installed a 28,000 gallon UST in 2004. A Compliance Inspection (CI) in 2006 identified some paperwork violation which were corrected. The site was classified as a LUST site in 2005 when a leak detection alarm was reported to TDEC. After recalibration of the system and a review of past detector records, it was determined that no releases from the UST system had occurred. A CI performed in 2008 found no violations.

# **Database Search Results**

Facility	Location Direction & Distance	Record	Comment
Kroger	244 South Hall Road 0.017 mile SE	LUST UST HIST UST	Facility ID # 2-050330 is adjacent to the subject property. The fuel center is approximately 500 feet southeast of the property.

Kwik Pantry	113 Washington Avenue 0.480 mile SE	LUST HIST UST AIRS	Facility ID # 2-050052 located more than 2500 feet from the property and downgradient. Not considered an REC.

S&ME also reviewed the list of orphan/unmappable sites and zip code listing in the EDR database report for facilities within the ASTM minimum search distances. None of the listed orphan/unmappable sites were recognized as being in close proximity to the subject property. However, due to the limited data provided by EDR, S&ME was unable to verify the locations of all of the facilities.

### 4.2 Additional Environmental Record Sources

# 4.2.1 EDR Supplementary Sources

The EDR report also includes additional EDR proprietary environmental records not listed among the standard federal, state and tribal databases.

**Additional EDR Proprietary Environmental Record Source** 

Database	Approximate Search Distance	Search Results (number of sites)
Manufactured Gas Plants	1 mile	0
EDR Historical Auto Stations	0.25 mile	0
EDR Historical Cleaners	0.25 mile	0

## 4.2.2 Tribal Record Sources

S&ME contracted with EDR to conduct a database search of environmental tribal records associated with the subject property. No environmental tribal records were identified.

**Tribal Records** 

Database	Approximate Search Distance	Search Results (number of sites)
Indian Reservations	1 mile	0
Indian LUST	0.5 mile	0
Indian UST	0.25-mile	0
Indian ODI	0.5 mile	0
Indian VCP	0.5 mile	0

The site does not appear to be located on or near any tribal lands. According to the Tennessee Commission of Indian Affairs (TCIA), the Yuchi, Koasati, Tuskegee, Muscogee (Creek), Chickasaw, Natchez, Cherokee, Chickamauga, Shawnee, and Choctaw tribes are recognized as historic Indian tribes in the State of Tennessee. Currently, none of the tribes identified on the TCIA web site (<a href="http://www.state.tn.us/environment/boards/tcia/documents.shtml">http://www.state.tn.us/environment/boards/tcia/documents.shtml</a>) are listed in Blount County.

### 4.3

# **Physical Setting Sources**

S&ME reviewed the United States Geological Survey topographic map depicting the site and surrounding area. The map reviewed consisted of the Maryville, Tennessee 7-1/2 minute topographic quadrangle. The maps is dated 1979. That portion of the topographic map showing the property and immediately surrounding area is included in Appendix I (Figure 1).

Three small structures, appearing to be a residence and farm buildings, were observed on the property. In addition, a closed depression is indicated on the property.

The site lies within the Appalachian Valley and Ridge Physiographic Province of East Tennessee. This Province is characterized by elongated, northeasterly-trending ridges formed on highly resistant sandstone and shale. Between ridges, broad valleys and rolling hills are formed primarily on less resistant limestone, dolomite, and shale.

Published geologic information indicates that the site is underlain by bedrock from the Nolichucky Shale Formation of the Conasauga Group. This formation is primarily composed of thin-bedded shale and calcareous siltstone with minor amounts of limestone. The Nolichucky Shale Formation typically weathers to produce a reddish-brown or faintly green shaly soil containing red clay from limestone units.

# 4.3.1 Aerial Photographs

Aerial photographs of the subject property and surrounding properties were obtained from EDR and the United States Geological Survey (USGS). The photographs reviewed were dated 1974, 1976, 1982, 1985, 1992, 1997, and 2006. The 1976 and 1982 photographs were of such a quality that details on the property could not be observed. A building corresponding with the current building was observed on the 1974 and subsequent photographs. No significant changes to the property were observed in the later photographs. Copies of the historical aerial photographs are included in Appendix III.

# 4.3.2 Sanborn Maps

S&ME contracted with EDR to conduct a database search of Sanborn Fire Insurance Maps that depicted the subject property. Sanborn map coverage was available for the years 1917 and 1925. The Sanborn maps identified three dwellings and a small store

along the southwest portion of the property. No other buildings were indicated on the subject property.

# 4.3.3 City Directories

S&ME contracted with EDR to conduct a database search of city directories for the subject property and properties in the vicinity of the subject property. The directories searched by EDR included the years 1990, 1998, 2001, and 2008. The subject property address was identified in all of the directories under three car wash names (Volunteer Car Wash in 1990, Magic Tunnel Car Wash in 1998, and Autowash Express of Alcoa in 2001 and 2008). The adjoining properties detail identifies the surrounding properties as consisting of retail businesses along South Hall Road. Copies of the EDR city directories are included in Appendix III.

## 4.3.4 Tribal Records

S&ME contracted with EDR to conduct a database search of environmental tribal records associated with the subject property. No environmental tribal records were identified.

# 4.3.5 Historical Topographic Maps

S&ME contracted EDR to conduct a search of available USGS historical topographic maps as a standard historical source to address 5-year data gaps. The mapping typically identifies on-site structures and helps to establish general property use in the vicinity.

S&ME reviewed the historic 1901, 1953, 1966, and 1979 7.5' Maryville, Tennessee topographic quadrangle. The scale of the 1901 map was such that subject property details could not be observed. The structures observed on the Sanborn maps were also observed on the 1953 and 1979 topographic maps. The structures were not indicated on the 1966 map. The current structure was not identified on any of the maps observed. Historical topographic maps are included in Appendix III.

# 4.4 Historical Use Information on Adjoining Properties

Historical records indicate that the surrounding properties along South Hall Road were developed with retail facilities some time prior to 1970. The properties to the west have been, and still are, residential.

## 5. SITE RECONNAISSANCE

# 5.1 Methodology and Limiting Conditions

A site reconnaissance of the subject property and surrounding area was performed by S&ME staff scientist, Tim Schalk, on August 5, 2009. The on-site observations were followed by a vehicular survey of the surrounding area. The purpose of the site reconnaissance was to identify *recognized environmental conditions* at the subject property and identify sites of similar environmental concern located within the ASTM minimum search distances. S&ME personnel searched for evidence of past or present activities which could have led to the deposition of hazardous substances or petroleum products.

# 5.2 General Site Setting

# 5.2.1 Current Use(s) of the Property

The subject property is currently contains a vacant building previously occupied by Auto Express Car Wash, asphalt paved parking areas, and grassed areas.

# 5.2.2 Past Use(s) of the Property

According to observations during the site reconnaissance, interviews, and historical documentation, the subject property was residential prior to the 1970's. Since that time, the property has been occupied by a number of car wash businesses.

# 5.2.3 Current Use(s) of Adjoining and Surrounding Properties

Retail properties characterize the areas northwest, southeast, and east of the subject property. Residential properties are to the west.

# 5.2.4 Past Use(s) of Adjoining and Surrounding Properties

The historical records reviewed indicate that the surrounding properties along South Hall Road had been developed into retail businesses some time prior to 1970. No other past usage of the surrounding properties could be ascertained during the off-site reconnaissance.

# 5.2.5 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

The overall topographic slope is down to the west. Rock outcrops were not observed on the subject property. Information pertaining to geologic and hydrogeologic conditions obtained from standard resources is provided in Section 4.3.

# 5.2.6 Description of Structures and Roads

South Hall Road is a four lane thoroughfare with a center turn lane. Lindsay Street and Rankin Road are two lane thoroughfares. Retail structures in the immediate area appear to have been built within the last 40 years. Residential properties appear to have been built within the last 75 years.

# 5.2.7 Potable Water Supply and Sewage Disposal System

Potable water and sewage disposal is provided by the City of Alcoa. No water supply wells were observed on the subject property.

### 5.3 Exterior Observations

The subject property contains approximately one acre of land at 220 South Hall Road. A concrete block car wash building is located on the southwest portion of the property. The northeast portion consists of asphalt paved parking for the car wash and adjacent Kroger food store. A portion of the property northeast of the car wash is grass covered and serves as the exit from the car wash. A fenced-in area along the southeast corner of the building contains a vacuum system. No evidence of USTs (fill or vent pipes) was observed on the property. Stormwater drains were observed in the parking lot area of the property. No hazardous materials were observed on the exterior of the property.

### 5.4 Interior Observations

The car wash building contains a customer service area, an office, and the car wash bay. A trench drain traverses the length of the car wash area. The trench drain flows into the sewer system. Hydraulic and soap dispensing equipment is located in a room along the southeast side of the building. Minor staining was observed in the room. The staining is considered a *de minimis* condition which would not be subject to regulatory action. No hazardous materials were observed in the interior of the building on the property.

#### 6. INTERVIEWS

## 6.1 Interview with Past and Present Owners

S&ME interviewed Ms. Susan King, widow of Harold King, concerning the subject property. Ms. King stated that as far as she knows, the only business on the subject property was a car wash. Ms. King is unaware of any USTs or other environmental concerns in connection with the subject property.

# 6.2 Interview with Key Site Manager

The property owner is considered the site manager.

# 6.3 Interview with Occupants

The subject property is currently unoccupied.

## 6.4 Interview with Local Government Officials

S&ME has contacted Fire Chief Roger Robinson of the Alcoa Fire Department concerning any emergency or spill responses to the subject property. Chief Robinson indicated that there have been no emergency or spill responses to the subject property.

### 6.5 Interviews with Others

No other individuals were interviewed during the performance of this assessment.

# 7. FINDINGS

# 7.1 On-Site Findings

No on-site findings were observed during the performance of this assessment.

# 7.2 Off-Site Findings

Thirteen off-site regulated facilities were identified within the ASTM minimum search distances.

## 8. OPINION

## 8.1 On-Site Opinions

No on-site RECs were observed during the performance of this assessment.

# 8.2 Off-Site Opinions

The adjoining Kroger facility contains a fuel center approximately 500 feet to the southeast. A review of the regulatory file for the Kroger facility did not identify any releases to the environment. The twelve remaining off-site facilities are located more than 1,700 feet from the subject property. Given their regulatory status or distances from the subject property, the thirteen off-site facilities are not considered RECs in connection with the subject property.

# 8.3 Data Gaps

Historical data gaps were encountered during the performance of this assessment. Not all historical records were completed back to the first use of the subject property. Historical data gaps regarding the use of the subject property are not considered significant because other historical documents identified the property back to its first use. These limitations are not considered significant.

# 8.4 Additional Investigation

Considering the opinions relative to on-site and off-site conditions described above and the information currently known about the subject property and adjacent properties, additional investigation would not be necessary to determine whether the past storage and use of petroleum products or hazardous materials at the property have impacted the subsurface.

### 9. CONCLUSIONS

We have performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E 1527-05 for the Auto Express Car Wash facility in Alcoa, Tennessee. Any exceptions to or deletions from this practice are described in Section 2.4 of this report. Based on the results of this Phase I ESA, S&ME identified no evidence of RECs in connection with the subject property.

### 10. DEVIATIONS

S&ME has endeavored to perform this Phase I ESA in substantial conformance with the scope and limitations of ASTM Standard Practice E 1527-05. The environmental professional who performed the Phase I ESA did not feel the need to deviate from the standard.

### 11. ADDITIONAL SERVICES

No additional services were provided.

## 12. REFERENCES

Material references are cited within their respective sections.

#### **13.** SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

We, Timothy S. Schalk and Eric M. Solt, declare that, to the best of our knowledge, we meet the definition of Environmental Professional as defined in paragraph 312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Staff Scientist

Senior Reviewer

#### 14. QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

S&ME provides a broad range of environmental services, including site assessments for real estate transactions. S&ME has over 750 employees located in twenty-two offices throughout the southeast. ENR ranked S&ME as one of the 200 largest environmental firms in the country.

The environmental professional for this Phase I ESA is Mr. Timothy S. Schalk. Mr. has 15 years of environmental experience performing and managing Phase I and II Environmental Site Assessments. Please refer to Mr. Schalk's resume in Appendix VII for further details.

The senior reviewer for this project is Eric M. Solt. Mr. Solt is a registered professional geologist in the State of Tennessee. Mr. Solt has 20 years experience in conducting environmental assessment activities. Please refer to Mr. Solt's resume on Appendix VII for further details.

#### **EDR Proprietary Records**

Manufactured Gas Plants..... EDR Proprietary Manufactured Gas Plants

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 01/09/2009 has revealed that there is 1 CERCLIS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALCOA INC. (SOUTH PLANT)	HALL ROAD	NW 1/4 - 1/2 (0.372 mi.)	D15	26

#### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1 RCRA-LQG site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALCOA INC. (SOUTH PLANT)	HALL ROAD	NW 1/4 - 1/2 (0.372 mi.)	D15	26

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1

RCRA-SQG site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MOLECULAR PATHOLOGY LABORATORY	250 EAST BROADWAY	SSE 1/2 - 1 (0.503 mi.)	K58	84

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 4 RCRA-CESQG sites within approximately 1 mile of the target property.

## State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environment & Conservation's list: Sanitary, Industrial, Demolition, Solid Waste Processing Facilities and Closed Landfills.

A review of the SWF/LF list, as provided by EDR, and dated 04/04/2009 has revealed that there are 3

SWF/LF sites within approximately 1 mile of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

### Local Lists of Registered Storage Tanks

HIST UST: This database is no longer updated by the agency. It contains records and detail fields that the current UST database does not.

A review of the HIST UST list, as provided by EDR, and dated 03/04/2005 has revealed that there are 4 HIST UST sites within approximately 0.25 miles of the target property.

#### Other Ascertainable Records

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2007 has revealed that there is 1 TRIS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALCOA INC. (SOUTH PLANT)	HALL ROAD	NW 1/4 - 1/2 (0.372 mi.)	D15	26

PADS: The PCB Activity Database identifies generators, transporters, commercial storers and/or brokers and disposers of PCBs who are required to notify the United States Environmental Protection Agency of such activities. The source of this database is the U.S. EPA.

A review of the PADS list, as provided by EDR, and dated 02/26/2009 has revealed that there are 3 PADS sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page	
ALCOA INC. (SOUTH PLANT)	HALL ROAD	NW 1/4 - 1/2 (0.372 mi.)	D15	26	
ALCOA ELECTRIC DEPT.	264 N. RANKIN ROAD	NW 1/2 - 1 (0.548 mi.)	62	89	
CITY OF MARYVILLE OPERATIONS	332 HOME AVENUE	SW 1/2 - 1 (0.610 mi.)	M71	113	

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/28/2009 has revealed that there are 38

FINDS sites within approximately 1 mile of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

**EDR ID Number** 

information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

> AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET. WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

> CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D022

Waste name: CHLOROFORM

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE. ETHYL BENZENE. ETHYL ETHER. METHYL ISOBUTYL KETONE. N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and

> ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include:

Incident Tracking, Compliance Assistance, and Compliance Monitoring.

> AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

> ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

**DELISTED NPL: National Priority List Deletions** 

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

#### Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 10/12/2009 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Next Scheduled EDR Contact: 10/19/2009 Data Release Frequency: Quarterly

#### Federal RCRA generators list

#### RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008 Date Data Arrived at EDR: 11/18/2008 Date Made Active in Reports: 03/16/2009

Number of Days to Update: 118

Source: Environmental Protection Agency

Telephone: (404) 562-8651 Last EDR Contact: 07/23/2009

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008 Date Data Arrived at EDR: 11/18/2008 Date Made Active in Reports: 03/16/2009

Number of Days to Update: 118

Next Scheduled EDR Contact: 10/19/2009 Data Release Frequency: Quarterly

#### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008

#### Federal institutional controls / engineering controls registries

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/31/2009 Date Data Arrived at EDR: 04/22/2009 Date Made Active in Reports: 05/05/2009

Number of Days to Update: 13

Source: Environmental Protection Agency Telephone: 703-603-0695

Last EDR Contact: 06/29/2009

Next Scheduled EDR Contact: 09/28/2009 Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/31/2009 Date Data Arrived at EDR: 04/22/2009 Date Made Active in Reports: 05/05/2009

Number of Days to Update: 13

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 06/29/2009

Next Scheduled EDR Contact: 10/19/2009 Data Release Frequency: Annually

#### State- and tribal - equivalent NPL

SHWS: Promulgated Sites

"Inactive hazardous substance sites that constitute an imminent, substantial danger" is an inactive hazardous substance site where there is a threat of danger to the public health, safety, or environment which is both real and presently existing. Such situations may include, but are not limited to one or more of the following: an immediate action is necessary to minimize an ongoing threat to the public health or pollution of the environment, an inactive hazardous substance site where there is an active release, where direct access to the hazardous substance is not controlled, or where incompatible hazardous substances are found in close proximity. Also known as Promulgated Sites List.

Date of Government Version: 04/28/2009 Date Data Arrived at EDR: 05/06/2009 Date Made Active in Reports: 05/29/2009

Number of Days to Update: 23

Source: Department of Environment & Conservation

Telephone: 615-532-0900 Last EDR Contact: 07/27/2009

Next Scheduled EDR Contact: 10/26/2009 Data Release Frequency: Semi-Annually

## State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Disposal Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites

Date of Government Version: 04/04/2009 Date Data Arrived at EDR: 04/21/2009 Date Made Active in Reports: 05/29/2009

#### State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup, Oversight and Assistance Program Sites

The Voluntary Cleanup Oversight and Assistance Program (VOAP) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. The program is open to everyone with an interest in addressing contamination at a site.

Date of Government Version: 04/27/2009 Date Data Arrived at EDR: 04/28/2009 Date Made Active in Reports: 05/29/2009

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

#### Local Lists of Hazardous waste / Contaminated Sites

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### CDL: Registry of Contaminated Properties

Pursuant to TCA 68212509 the following properties have been quarantined because of methamphetamine production, but have not been cleaned and certified within the 60day time frame allotted by the statute. These properties are hereby registered by the Tennessee Department of Environment and Conservation as unremediated methamphetamine sites. This is not a comprehensive list of quarantined properties. These are properties that TDEC has been notified as being quarantined, but have not been cleaned within the 60 day grace period. Other properties where methamphetamine production residues are a concern may not have been quarantined, may not have been reported to TDEC, or may not have passed the 60day grace

#### Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## **EDR PROPRIETARY RECORDS**

## EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

## **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Most Recent Revision: 1979

South Map: 35083-F8 BLOCKHOUSE, TN

Most Recent Revision: 1966

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

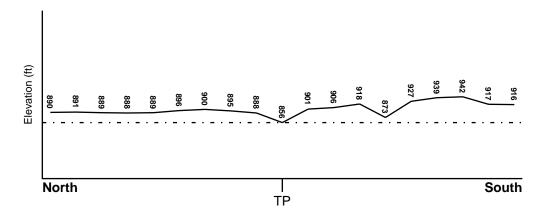

## **TOPOGRAPHIC INFORMATION**

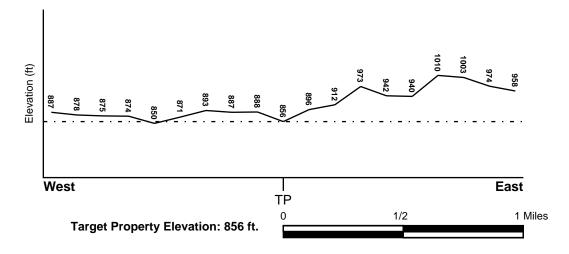

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE** 

FEMA Flood
Target Property County Electronic Data

BLOUNT, TN Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

MARYVILLE YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW**®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Paleozoic Category: Stratified Sequence

System: Ordovician Series: Ordovician

Code: O (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: DUNMORE

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

	Soil Layer Information						
Boundary				Classi	Classification		
Layer	Upper Lower		Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	8 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 4.50
2	8 inches	80 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50

#### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

cherty - silt loam unweathered bedrock

cobbly - loam

Surficial Soil Types: loam

cherty - silt loam unweathered bedrock

cobbly - loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: clay loam

cherty - clay cherty - silt loam silty clay loam cherty - silty clay loam

stratified

unweathered bedrock

cobbly - loam

## **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory Source: Tennessee Spatial Data Server

Telephone: 931-528-6481

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# The EDR Aerial Photo Decade Package

# **EDR Aerial Photo Decade Package**

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

## 2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

**City Directory Report.** Three important enhancements have been made to the EDR City Directory Abstract:

- 1. *Executive Summary*. The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
- 2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
- 3. Findings Listed by Location. Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

**Options for Selecting Adjoining Properties.** Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

- 1. You Select Addresses and EDR Selects Addresses. Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
- 2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
- 3. You Select Addresses. Use this method for research based solely on the addresses you select or enter into the system.
- 4. Hold City Directory Research Option. If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit <a href="https://www.edrnet.com/2009enhancements">www.edrnet.com/2009enhancements</a>

## **EXECUTIVE SUMMARY**

## **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

## **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## Certified Sanborn® Map Report Enhancements for 2009

The accompanying Certified Sanborn Map Report reflects a number of enhancements that make it easier for you to review these historical maps. EDR has digitally joined together the more than one million fire insurance maps from the Sanborn Library collection so that your target property is centered, making it easier for you to review adjoining properties. Here is a list of the new features:

- · Your target property is centered on each map. You can quickly locate your target property and view adjoining properties. Plus, adjoining properties are included more often, reducing your need to refer to additional maps.
- · All maps are now displayed at a uniform scale. This makes it easier for you to view changes to the property over time.
- · We've increased coverage by adding thousands of new maps from 40 cities for years 1994-2007.
- · A new Map Key and Sheet Thumbnails let you reference sheet numbers, year and volume of original Sanborn Map panels used for this report.

For more information about the new enhancements to the Certified Sanborn Map Report, contact your EDR representative at 800-352-0050.

S&ME, INC. PROPOSAL AND AGREEMENT FOR SERVICES

July 27, 2009

Furrow Auction Company 1022 Elm Street Knoxville, Tennessee 37921

Attention:

Mr. Rob Strickland

Reference:

Proposal for Phase I Environmental Site Assessments

Auto Express Car Wash

220 South Hall Road, Alcoa, TN

and

Former Townsend Primary Care Clinic 1151 Laurel Road, Townsend, Tennessee

S&ME Proposal No. 3409386

Dear Mr. Strickland;

S&ME, Inc. (S&ME) appreciates the opportunity to submit this proposal to perform Phase I Environmental Site Assessments (ESAs) for the above-referenced properties. This letter outlines our understanding of the project and our approach to the assessment, and presents a schedule and proposed fee for these services. Our Agreement for Services (AS-071) is attached and is incorporated as part of this proposal.

#### PROPERTY DESCRIPTION

Information that we have concerning the subject property was provided by yourself to Mr. Eric Solt of S&ME via a telephone conversation on July 27, 2009. The subject properties consist of two separate parcels: the Auto Express Car Wash parcel located at 220 South Hall Road in Alcoa, Tennessee and the former Townsend Primary Care Clinic located at 1151 Laurel Road in Townsend, Tennessee. The Alcoa property is identified as Parcel 026.01, Map 047P, Group A.

#### SCOPE OF SERVICES

The most widely utilized standard for performing Phase I assessments is the standard developed by the American Society for Testing and Materials (ASTM) entitled E 1527-05, Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process. An assessment performed in accordance with this standard satisfies requirements for All Appropriate Inquiries (AAI) as presented in 40 CFR Part 312, and thus, fulfills one requirement for the User to qualify for certain Landowner Liability Protections (LLPs). We propose to use ASTM E 1527-05 for the proposed project. If another procedure must be used, such as specified by a lender, please provide us a copy of that procedure prior to authorizing us to proceed. Use of an alternate procedure may require a change to the fee and schedule quoted in this proposal.

We understand that the proposed Phase I ESAs are being performed in connection with planned real estate transactions involving the subject properties. Accordingly, the purpose of the assessment is to identify recognized environmental conditions (as defined by ASTM) in connection with the property.

S&ME's approach to performing a Phase I Environmental Site Assessment (ESA) under the ASTM E 1527-05 Standard Practice includes a review of the public record, interviews, a site reconnaissance and preparation of a written report containing findings, opinions and conclusions.

## Task I - Review of the Public Record

A review of public records for the site and the immediate vicinity will be conducted to characterize environmental features of the site and to identify past and present land use activities, on or in the vicinity of the site, which may indicate a potential for recognized environmental conditions. The review of the public record will include:

- 1. Review of federal, state and tribal standard environmental record sources as well as selected local records in accordance with the minimum search distances specified in ASTM E 1527-05. The search of most records will be performed by a firm specializing in this service subcontracted to S&ME with results presented in a written report that will be appended to S&ME's Phase I ESA report.
- 2. Examination of one or more of the following historical sources: aerial photographs, fire insurance maps, property tax records, street directories, USGS 7.5 minute topographic maps, building department records, and zoning/land use records of the site and vicinity for evidence suggesting past uses that might have involved hazardous substances or petroleum products.

#### Task II - Site Reconnaissance

A site reconnaissance will be performed to identify visual signs of environmental conditions on or adjoining the site, and to evaluate evidence found in the review of public record that might be indicative of activities resulting in hazardous substances or petroleum products being used or deposited on the site. The site reconnaissance will include the following activities:

- A visual reconnaissance of the site and adjoining properties will be performed to
  observe signs of spills, stressed vegetation, buried waste, underground or above
  ground storage tanks, subsidence, transformers, or unusual soil discoloration
  which may indicate the possible presence of hazardous substances (as per
  CERCLA) or petroleum products.
- The periphery of the property will be viewed and a walk-through of accessible areas of the site interior, including any on-site buildings, will be conducted.

Areas of the site will be photographed to document the current use(s) of the
property as well as significant conditions such as unusually discolored soil,
stressed vegetation, or other significant features associated with the property.

#### Task III- Interviews

Interviews with appropriate local officials will be conducted to consider any local knowledge of hazardous substances or petroleum products on the subject property or on adjacent properties. In addition, current property owner(s), operators and occupants will be interviewed regarding the potential for contamination at the subject property to the extent they have been identified by the client. Interviews with past owners, operators and occupants may be necessary, particularly if the current owner has held title for less than two years, or if past owner interviews are necessary to fill data gaps.

## Task IV - Written Report

Upon completion of the public record review, interviews and site reconnaissance, S&ME will prepare a written report documenting findings, opinions and conclusions. The report will reflect our evaluation for use by the client in completing the planned property transaction. The conclusions will be presented in terms of the presence or absence of recognized environmental conditions as defined in ASTM Standard Practice E 1527-05. Unless otherwise directed, we will produce three print copies of the report as well as one electronic copy in PDF format. Separate reports will be issued for each facility.

#### **EXCLUDED SERVICES**

Unless specifically authorized as an addition to the Phase I ESA scope of services, the assessment will not address environmental conditions not specifically included in the ASTM E 1527-05 standard including, but not limited to sampling of materials (i.e., soil, surface water, groundwater or air), or the assessment of business risk issues such as asbestos, lead-based paint, wetlands; lead in drinking water; mold, fungi or bacteria in on-site buildings; regulatory compliance; cultural/historic resources; industrial hygiene; health/safety; ecological resources; endangered species; indoor air quality, including vapor intrusion; radon; or high voltage power lines.

#### ADDITIONAL SERVICES

We understand that X-ray equipment may remain in the former Townsend Primary Care Clinic facility. You have requested that S&ME assist in determining whether a radioactive source material remains at the site and, if so, aid in determining proper handling and re-use or disposal options for the equipment. Please note that the findings associated with the proposed additional services will be provided under separate cover from the Phase I ESA.

#### **LIMITATIONS**

As indicated in ASTM E 1527-05, the practice is intended to constitute all appropriate inquiries to permit the User to satisfy one requirement to qualify for Landowner Liability Protections including the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability in an approach that is both commercially prudent and reasonable. As such, the ASTM standard practice seeks to

reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the property. Further, appropriate inquiry does not imply an exhaustive assessment of real property, but instead calls for the environmental professional to identify a balance between competing demands of limited cost and time and the reduction of uncertainty about unknown conditions. A conclusion of "no evidence of recognized environmental conditions" should not be interpreted as a guarantee or warranty that the property is "clean" or free of all contaminants. Environmental conditions may exist on the property that may not be identified through the scope of ASTM E 1527.

#### **CLIENT RESPONSIBILITIES**

The Scope of Services, fee and project schedule presented herein are contingent upon the client fulfilling the following responsibilities:

- 1. Provide a signed Agreement for Services (attached Form AS-071).
- 2. Provide the name and contact information for past and present property owner(s), operators and occupants to enable us to conduct the interviews specified in ASTM E 1527-05.
- 3. Provide access to the properties, including any on-site buildings.
- Complete and return the attached User Questionnaires as specified in ASTM E 1527-05 including a review of recorded land title and judicial records for environmental liens or activity and use limitations.
- 5. Provide copies of all existing environmental reports or testing results relating to conditions at the subject properties that may be available to the client (see attached User-Furnished Information checklist).
- 6. Identify the addressees of the Phase I ESA report such as a lender, if applicable.

#### **SCHEDULE**

According to your schedule requirements, the Phase I ESA scope of work outlined above will be completed before August 22, 2009. Our schedule and fee are contingent upon your completion of those items listed under User Responsibilities in this proposal.

Please note that our ability to complete the services involved in the review of the public record within the project schedule often depends on the availability of certain maps and records that we may want to review or personnel whom we would want to interview. If we were to experience difficulties in this regard, we would inform you at the earliest possible time and obtain your concurrence on extending the evaluation time period, or terminating that aspect of the evaluation with a discussion of the ramifications of producing the report without the benefit of that information. ASTM Standard Practice E 1527-05 states that information is reasonably ascertainable if it can be provided for

review within 20 days of the request. If information which we request to review is not made available within a 10-day period, we would consult with you on whether to extend our scheduled completion date or to complete the project without the benefit of that information (either option will satisfy ASTM Standard Practice E 1527-05 requirements).

#### FEE

S&ME is prepared to complete the Phase I ESA services outlined above for a lump sum fee of \$5,100 [\$2,300 for the Alcoa site, \$2,800 for the Townsend site (includes additional services)]. Any subsequent services or project deliverables, such as additional report copies, requested by you will be invoiced on a time-and-expense basis. This quotation is valid for a period of 90 days.

### **USE OF PROPOSAL/REPORT**

This proposal is solely intended for the services as described in the Scope of Services. The Scope of Services may not be modified or amended, unless the changes are first agreed to by the client and S&ME. Use of this proposal and resulting documents, including final report, will be limited to the referenced project and client. No other use is authorized by S&ME.

### **AUTHORIZATION**

Agreement for Services, Form AS-071, is attached and incorporated as part of this proposal. Please sign the form and return it to S&ME. Upon receipt of the signed agreement, a countersigned copy will be returned to you, and we will proceed with the performance of our services. Any changes or modifications to AS-071 or the proposal are required to be acknowledged by both parties initialing acceptance of this proposal and agreement for services next to the change or modification. If you elect to accept our proposal by issuing a purchase order, then please specifically reference this proposal number in the purchase order as authorization to proceed with the performance of our services. However, the terms and conditions included in any purchase order shall not apply and are hereby specifically rejected, as our agreement is for services which are not compatible with purchase order agreements. If this proposal is transmitted to you via email, and if you chose to accept this proposal by email, your reply email acceptance will serve as your representation to S&ME that you have reviewed the proposal and the associated Agreement for Services (AS-071) and hereby accept both as written.

S&ME appreciates the opportunity to be of service to you. If you have any questions regarding the outlined scope of work, or if we may be of any further assistance, please call.

Sincerely, S&ME, Inc.

Dinothy S Schalk

User Questionnaires

User-Furnished Information

# PHASE I ENVIRONMENTAL SITE ASSESSMENT

## **User Questionnaire**

SITE: 220 South Hall Road, Alcoa, TN S&ME Proposal No:3409386
In order to qualify for Landowner Liability Protections (LLPs), ASTM E 1527-05 specifies that the ESA User must provide the following information, if available, to the Environmental Professional. Failure to provide this information could make the ESA incomplete and the User unable to qualify for LLPs.
<ol> <li>Are you aware of any environmental clean-up liens against the property that are filed or recorded under federal, tribal, state or local laws?</li> </ol>
2. Are you aware of any Activity and Use Limitations (AUL's) such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, state or local laws?
3. As the User of this ESA, do you have any specialized knowledge or experience related to the subject property or nearby properties?
4 Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If not, is the lower purchase price attributable to known or suspected contamination?
Are you aware of information about the property that would be helpful in identifying conditions indicative of contaminant releases, such as: a) past use of the property; b) presence of specific chemicals (past or present); c) spills or chemical releases at the property; or d) environmental cleanups that have taken place at the property?
As the User of this Phase I ESA and based on your knowledge and experience of the property, are there any obvious indicators that point to the presence or likely presence of contamination on the property?
In addition, certain other information should be provided, although not necessarily to qualify for <i>LLPs</i> , including: contact information for past and current property owners, operators and occupants; the reason for performing this ESA; and documentation showing the property address, location and boundaries.

PROJECT					
Project Name: Proposal for Phase I Environmental Site Assessments					
Project location: (Street Address) Auto Express Car Wash - 220 South Hall Rd, Alcoa, TN Former Townsend Primary Care - 1151 Laurel Ave., Townsend, TN City: Alcoa / Townsend State: Tennessee Zip:					
	BE RENDERED				
Proposal Number: 3409386 dated: 07/27/2009 is incorporated into this Agreement For Services.  This Agreement For Services is incorporated into the above Proposal.					

Client desires to contract with Consultant for the Services to be Rendered (Services) on Client's Project, as contained in Consultant's Proposal. The Proposal and Client's Project are referenced immediately above.

THEREFORE, in consideration of the Mutual Covenants and Promises included herein, Client and Consultant agree as follows:

- 1. ACCEPTANCE: Client hereby accepts this offer by Consultant to provide the Services as contained in Consultant's Proposal and agrees that such Services and any additional Services authorized by Client shall be governed by the terms of this Agreement. If Client directs that Services commence prior to execution of this Agreement, Client agrees that commencement of Services by Consultant is in reliance on Client having accepted the terms of this Agreement and acknowledgment that Client will execute this Agreement, forthwith. Client may accept this Agreement for Services through the use of Client's Purchase Order, however all preprinted terms and conditions on Client's purchase order are inapplicable and the terms of this Agreement shall govern. Unless this offer is previously accepted, it will be withdrawn automatically at 5:00 pm EST, ninety (90) days from the date of issue.
- CONTRACT DOCUMENTS: "Contract Documents" shall mean this Agreement for Services, the Proposal identified under "SERVICES TO BE RENDERED," and any modifications, extensions, and additions to the "Services to be Rendered" that Consultant has performed or may perform for Client.
- 3. PAYMENT: Client will pay Consultant for Services and expenses in accordance with the Contract Documents. If prices for Services are not specified in the Contract Documents, Consultant's current fee schedule in effect for the location providing the Services shall control. Consultant will submit progress invoices to Client monthly and a final invoice upon completion of Services. Payment is due upon receipt of the invoice unless otherwise agreed to in writing prior to the submittal of the invoice. Invoices are past due 30 calendar days after the date of the invoice. Past due amounts are subject to a late fee of one and one-half percent per month (18 percent per annum) or the highest amount allowed by applicable law on the outstanding balance, whichever is less. Attorney's fees and other costs incurred in collecting past due amounts shall be paid by Client. The Client's obligation to pay under this Agreement is in no way dependent upon the Client's ability to obtain financing, payment from third parties, approval of governmental or regulatory agencies, or Client's successful completion of the Project.

Consultant shall be paid in full for all Services rendered under this Agreement, including any additional Services authorized by Client. However, if Client objects to all or any portion of any invoice, Client shall so notify Consultant in writing of the objection within fifteen (15) days from date of invoice, give reasons for the objection, and pay that portion of the invoice not subject to Client's objection. Client and Consultant will informally discuss Client's objections to the invoice and attempt to reach a resolution mutually acceptable to Client and Consultant. If Client or Consultant determine that an informal resolution is not possible, then that party shall so state in writing to the other party and inlients a

final resolution pursuant to the Dispute Resolution provisions of this Agreement for Services. If the Client does not object in writing to all or a portion of the invoice within fifteen (15) calendar days from date of invoice, then the full amount of the invoice is due and payable and all objections are waived.

Without incurring any liability to the Client, Consultant may either suspend or terminate this Agreement if Client falls to pay any undisputed invoice amounts within 60 calendar days of the invoice date, or if Client states its intention not to pay forthcoming invoices. Such suspension or termination will not waive any other claim Consultant may have against Client. Following such suspension or termination, Consultant may resume work by mutual agreement with Client after payment by Client of all outstanding invoiced amounts and collection expenses. Client waives all claims for damages or delay as a result of such suspension or termination.

Any invoices that remain unpaid thirty (30) calendar days after Client's receipt of letter from Consultant demanding payment of the invoices or notification of a collection action by an attorney or collection agency shall constitute a release of Consultant by Client from any and all claims whatsoever, including, but not limited to, tort or contractual claims which Client may have against Consultant for Services performed under said invoice(s).

- 4. STANDARD OF CARE AND WARRANTY DISCLAIMER: Consultant and its agents, employees and subcontractors shall endeavor to perform the Services for Client with that degree of care and skill ordinarily exercised, under similar circumstances, by consultants practicing in the same discipline at the same time and location. In the event any portion of the Services fails to substantially comply with this standard of care obligation and Consultant is promptly notified in writing prior to one year after completion of such portion of the Services, Consultant will re-perform such portion of the Services, or if re-performance is impractical, Consultant will refund the amount of compensation paid to Consultant for such portion of the Services. THE REMEDIES SET FORTH HEREIN ARE EXCLUSIVE AND NO WARRANTY OR GUARANTEE, EITHER EXPRESS OR IMPLIED IS MADE OR INTENDED BY THIS AGREEMENT or by any report, opinion, or other instrument of Service provided pursuant to this Agreement.
- 5. LIMITATION OF REMEDIES: CONSULTANT'S AGGREGATE LIABILITY RESPONSIBILITY TO CLIENT, INCLUDING THAT OF OUR OFFICERS, DIRECTORS, EMPLOYEES AND AGENTS, IS LIMITED TO \$50,000 OR THE AMOUNT OF CONSULTANT'S TOTAL FEE UNDER THIS AGREEMENT, WHICHEVER IS GREATER, HEREINAFTER REFERRED TO AS LIMITATION OF REMEDY. THIS LIMITATION OF REMEDY APPLIES TO ALL LAWSUITS, CLAIMS OR ACTIONS, WHETHER IDENTIFIED AS ARISING IN TORT, CONTRACT, INCLUDING NEGLIGENCE (WHETHER SOLE OR CONCURRENT), PROFESSIONAL ERROR OR OMISSIONS, BREACH OF WARRANTY (EXPRESS OR IMPLIED), NEGLIGENT MISREPRESENTATION, AND STRICT LIABILITY, OR OTHER LEGAL THEORY, INCLUDING WITHOUT LIMITATION, CONSULTANT'S INDEMNITY OBLIGATIONS TO CLIENT RELATED TO THE SERVICES PROVIDED IN THIS AGREEMENT AND ANY CONTINUATION OR EXTENSION OF OUR SERVICES.

IF CLIENT DESIRES A HIGHER LIMITATION OF REMEDY, CONSULTANT MAY AGREE, AT CLIENT'S REQUEST, TO INCREASE THE LIMITATION OF REMEDY TO A GREATER SUM IN EXCHANGE FOR A NEGOTIATED INCREASE IN FEE. ANY ADDITIONAL CHARGE FOR A HIGHER LIMITATION OF REMEDY IS CONSIDERATION FOR THE GREATER RISK ASSUMED BY CONSULTANT AND IS NOT A CHARGE FOR ADDITIONAL PROFESSIONAL LIABILITY INSURANCE. ANY AGREEMENT TO INCREASE THE LIMITATION OF REMEDY MUST BE MADE IN WRITING AND SIGNED BY BOTH PARTIES IN ADVANCE OF THE PROVISION OF SERVICES UNDER THIS AGREEMENT.

BY ENTERING INTO THIS AGREEMENT, CLIENT ACKNOWLEDGES THAT THIS LIMITATION OF REMEDIES PROVISION HAS BEEN REVIEWED, UNDERSTOOD AND IS A MATERIAL PART OF THIS AGREEMENT, AND THAT CLIENT HAS HAD AN OPPORTUNITY TO SEEK LEGAL ADVICE REGARDING THIS PROVISION.

- DISCLAIMER OF CONSEQUENTIAL DAMAGES: In no event shall Consultant or Client be liable to the other for any special, indirect, incidental or consequential loss or damages, including, but not limited to, lost profits, damages for delay, or loss of use arising from or related to Services provided by Consultant.
- 7. REPORTS: In connection with the performance of the Services, Consultant shall deliver to Client one or more reports or other written documents reflecting Services provided and the results of such Services. All reports and written documents delivered to Client are instruments reflecting the Services provided by Consultant pursuant to this Agreement and are made available for Client's use subject to the limitations of this Agreement. Instruments of Service provided by Consultant to Client pursuant to this Agreement are provided for the exclusive use of Client, and Client's agents and employees for the Project and are not to be used or relied upon by third parties or in connection with other projects. Subject to the authorized use of Client, and Client's agents, and employees, all instruments of Service, other written documents, all original data gathered by Consultant and work papers produced by Consultant in the performance of or intrinsic to the Services included in the Services are, and shall remain, the sole and exclusive property of Consultant.

Documents that may be relied upon by Client are limited to the printed copies (also known as hardcopies) that are signed or sealed by Consultant. Files in electronic media format of text, data, graphics, or of other types that are furnished by Consultant to Client are only for the convenience of Consultant and Client. Any reliance on information obtained or derived from such electronic files will be at the Client's or other user's sole risk. Data stored in electronic format can deteriorate or be modified inadvertently or otherwise. Consultant shall not be responsible to maintain documents stored in electronic media. When transferring documents in electronic media format, Consultant makes no representations as to long-term compatibility, usability, or readability of such media format.

Consultant shall not be responsible for any alterations, modifications, or additions made in the electronic data by the Client or any other party for this Project or any other project without Consultant's written consent.

Client shall indemnify, and hold Consultant harmless against any claims, damages or losses arising out the reuse of the electronic data without Consultant's consent or arising out of alterations, modifications, or additions to the electronic data made by anyone other than Consultant.

Any instruments of Service, including reports, generated as part of this Agreement are intended solely for use by Client and shall not be provided to any other person or entity without Consultant's written authorization. To the fullest extent permitted by law, Client shall indemnify and hold harmless Consultant from and against any action or claim brought by any person or entity claiming to rely on the information or opinions contained in the Instrument of Service without Consultant's written authorization.

8. SAFETY: Consultant will maintain a safety program for its employees. Consultant specifically disclaims any authority or responsibility for general job safety and for the safety of persons who are not employed by Consultant. Should Client, or third parties, be conducting activities on the Site, then each shall have responsibility for their own safety and compliance with applicable safety requirements.

Field Personnei: The presence of Consultant's field personnei, either full-time or part-time, may be for the purpose of providing project administration, assessment, observation or field testing of specific aspects of the Project as authorized by Client. Should Client retain the Services of a Contractor(s) for the Project, Consultant is not responsible in any way whatsoever for the supervision or direction of the work of the Contractor(s), its employees or agents. The presence of Consultant's field personnel for project administration, assessment, observation or testing shall not relieve the Contractor(s) of his responsibility for performing work in accordance with the project plans and specifications.

If a Contractor (not a subcontractor of Consultant) is involved in the Project, Client agrees, in accordance with generally accepted construction practices, that the Contractor will be solely responsible for working conditions on the jobsite, including safety of all persons and property during performance of the work, and compliance with OSHA regulations. These requirements will apply continuously and will not be limited to normal working hours. It is agreed that Consultant does not have the duty or right to stop the work of the Contractor.

- 9. SAMPLES: Unless otherwise requested, test specimens or samples will be disposed of immediately upon completion of tests and analysis. Upon written request, Consultant will retain samples for an agreed to duration and for a mutually acceptable storage charge. In the event that samples contain or may contain hazardous materials, Consultant shall, after completion of testing and at Client's expense, return such samples to Client or make samples available for disposal by Client's agent. Client recognizes and agrees that Consultant is acting as a ballee and at no time assumes title to said samples.
- 10. INVENTIONS: Any and all inventions or discoveries relating to the Services, including improvements and modifications to existing products or processes made or conceived by Consultant or its employees during the term of this Agreement are and shall remain the sole and exclusive property of Consultant.
- 11. REPRESENTATIONS OF CLIENT: Client warrants and covenants that sufficient funds are available or will be available upon receipt of Consultant's invoice to make payment in full for the Services rendered by Consultant. Client warrants that all information provided to Consultant regarding the Project and Project location are complete and accurate to the best of Client's knowledge.
- 12. CLIENT OBLIGATIONS: Client agrees to furnish Consultant, its agents, employees, and subcontractors a right-of-entry and any authorizations needed for Consultant to enter onto the project site to perform the Services included in this Agreement. Consultant will take reasonable precautions to minimize damage to the Project Site from Consultant's activities and from the use of equipment. Client recognizes that the performance of the Services included in this Agreement may cause alteration or damage to the Site. Client acknowledges that some site disturbance is inherent in the work for which Consultant will not be responsible. Should Client not be owner of the property, then Client agrees to notify the owner of the aforementioned possibility of unavoidable alteration and damage and to indemnify, and hold harmless Consultant against any claims and claims related costs including attorney's fees by the owner or persons having possession of the site through the owner which are related to such alteration or damage.
- 13. UTILITIES: Client agrees to disclose the identity of all utilities serving the Project Site and the presence and accurate location of hidden or obscured man-made objects known to Client that may be in Consultant's work area. Client agrees to indemnify and hold harmless Consultant from all claims, suits, losses, personal injuries, death, and property liability including costs and attorney's fees resulting from damage or injury to utilities or subterranean structures (pipes, tanks, etc.) arising from the performance of Consultant's Services when the existence of such are not called to Consultant's attention or the location not correctly identified in information furnished Consultant.
- 14. CERTIFICATIONS: Client agrees not to require that Consultant execute any certification with regard to work performed, tested or observed under this Agreement unless: 1) Consultant believes that it has performed sufficient work to provide a sufficient basis to issue the certification; 2) Consultant believes that the work performed, tested or observed meets the criteria of the certification; and 3) Consultant has reviewed and approved in writing the exact form of such certification prior to execution of this Agreement. Any certification by Consultant is limited to an expression of professional opinion based upon the Services performed by the Consultant, and does not constitute a warranty or guarantee, either expressed or implied.
- 15. FAILURE TO FOLLOW RECOMMENDATIONS: The Client agrees that it would be unfair to hold the Consultant lieble for problems that may occur if the Consultant's recommendations are not followed. Accordingly, the Client waives any claim against the Consultant, and agrees to indemnify, and hold harmless the Consultant from any claim or liability for injury or loss that results from failure to implement the Consultant's recommendations or from implementation of the Consultant's recommendations in a manner that is not in strict accordance with them.

16. SCOPE OF SERVICES AND EXCLUDED SERVICES: Consultant's engagement under this Agreement includes only those Services specified in the Scope of Services. Client agrees it will not seek to hold Consultant responsible and expressly waives any claim against Consultant for not performing additional services that Client instructed Consultant not to perform, not performing additional services that were not specifically requested by Client and agreed to by both parties, and not performing recommended additional services that Client has not authorized Consultant to perform.

#### 17. TERMINATION:

- For Convenience Upon written notice, Client or Consultant may terminate the performance of any further Services included in this Agreement if the terminating party determines termination is in the terminating party's interest. Upon receipt of a termination notice by either party, Consultant shall stop work on all Services included in this Agreement and deliver any Instruments of Service complete at that time to Client and Client shall pay Consultant within thirty (30) days for all Services performed up to the dispatch or receipt of the termination notice. Upon Termination for Convenience, Consultant and Client shall have no further rights or remedies other than those included in this paragraph.
- For Cause –In the event of material breach of this Agreement, the party not breaching the Agreement may terminate it upon ten (10) days written notice delivered or mailed to the other party, which notice must identify the material breach. The Agreement may not be terminated for cause if the breaching party cures the breach within ten (10) days of receipt of the written notice. Upon Termination for Cause, Consultant shall stop work on all Services included in this Agreement and deliver any instruments of service complete at that time to Client and Client shall pay Consultant within thirty (30) days for all Services performed up to the termination. Upon Termination for Cause, Consultant and Client shall have no further rights or remedies other than those included in this paragraph.
- 18. UNFORESEEN CONDITIONS OR OCCURRENCES: If, during the performance of Services ,any unforeseen hazardous substance, material, element or constituent or other unforeseen conditions or occurrences are encountered which, in Consultant's judgment, significantly affects or may affect the Services, the risk involved in providing the Services, or the recommended Scope of Services, Consultant will promptly notify Client. Subsequent to that notification, Consultant may: (a) if practicable, in Consultant's judgment and with approval of Client, complete the original Scope of Services in accordance with the procedures originally Intended in the Proposal; (b) Agree with Client to modify the Scope of Services and the estimate of charges to include the previously unforeseen conditions or occurrences, such revision to be in writing and signed by the parties and incorporated into this Agreement, or (c) Terminate the Services effective on the date of notification pursuant to the terms of TERMINATION FOR CONVENIENCE. Client is responsible for reporting any releases of hazardous substances to appropriate government agencies as required by law. Client acknowledges that Consultant also may have reporting obligations under controlling law and regulations. Client waives any claim against Consultant and will Indemnify and hold Consultant harmless from any claim, injury or loss arising from the discovery of unforeseen hazardous substances.
- 19. FORCE MAJEURE: Consultant shall not be deemed to be in default of this Agreement to the extent that any delay or failure in the performance of the Scope of Work results from any causes beyond its reasonable control. For this purpose, such acts or events shall include, but are not limited to, storms, floods, unusually severe weather, epidemics, civil disturbances, war, riot, strikes, lockouts or other industrial disturbances, and the inability within reasonable diligence to supply personnel, equipment, information or material to the Project. In the event that such acts or events occur, it is agreed that Consultant shall attempt to overcome all difficulties arising and to resume as soon as reasonably possible the normal pursuit of the Services covered by this Agreement.
- 20. INSURANCE: Consultant shall maintain at its own expense the following insurance subject to normal industry exclusions: (1) Worker's Compensation Insurance and Employer's Liability insurance; (2) Commercial Automobile Liability Insurance with limits of \$1,000,000.00; (3) Commercial General Liability Insurance with limits of \$1,000,000.00; and (4) Professional Liability Insurance. Certificates can be issued upon request identifying details and limits of coverage.
- 21. INDEMNITY: Client agrees to indemnify, and save harmless Consultant, its agents, employees, and subcontractors from and against any and all losses, liabilities, and costs and expenses of every kind (including cost of defense, investigation, settlement, and reasonable attorney's fees), which Consultant, its agents, employees, and subcontractors may incur, become responsible for, or pay out as a result of bodity injuries (including death) to any person, damage to any property, or both, to the extent caused by Client's negligence or willful misconduct.

Subject to Article 5, Consultant agrees to indemnify, and save harmless Client from and against any and all losses, liabilities, and costs and expenses of every kind (including cost of defense, investigation, settlement, and reasonable attorney's fees) which Client may incur, become responsible for, or pay out as a result of bodily injuries (including death) to any person, damage to any property, or both, to the extent caused by Consultant's negligence or willful misconduct.

Subject to Article 5, Client and Consultant shall, in the event of liability arising out of their joint negligence or willful misconduct indemnify, and save harmless each other in proportion to their relative degree of fault.

22. DISPUTE RESOLUTION: Consultant may, in Consultant's sole discretion, pursue collection of past due invoices by litigation in a court of competent jurisdiction. Other than Consultant's collection of past due invoices, in the event of a dispute between Consultant and Client with regard to any matter arising out of or related to this Agreement, the Parties will use their best efforts to resolve the dispute amicably within fifteen (15) calendar days. If the dispute cannot be settled amicably, the Parties agree that the dispute shall be subject to mediation in accordance with the mediation rules of the American Arbitration Association or similar dispute resolution organization if the parties expressly agree. Except for collection actions by Consultant, mediation in good faith shall be a condition.

precedent to the institution of litigation by either party. Once a party files a request for mediation with the other party and with the American Arbitration Association, or similar dispute resolution organization, the parties agree to commence such mediation within thirty (30) days of the filing of the request. The costs of such mediation shall be borne equally by both Parties. If the dispute is not resolved after such mediation, then the dispute shall be resolved by litigation in a court of competent jurisdiction within the State where project is located.

- 23. CAPTIONS AND HEADINGS: The captions and headings in this Agreement are for convenience and reference only, and the words contained therein shall in no way be held or deemed to define, limit, describe, modify, or add to the interpretation, construction, or meaning of any provision of or scope or intent of this Agreement.
- 24. SEVERABILITY: If any provision of this Agreement, or application thereof to any person or circumstance, shall to any extent be invalid, then such provision shall be modified if possible, to fulfill the intent of the parties as reflected in the original provision, the remainder of this Agreement, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby, and each provision of this Agreement shall be valid and enforced to the fullest extent permitted by law.
- 25. ASSIGNMENT AND SUBCONTRACTS: Neither party may assign this Agreement, in whole or in part, without the prior written consent of the other party, except for an assignment of proceeds for financing purposes. Consultant may subcontract for the Services of others without obtaining Client's consent if Consultant deems it necessary or desirable to have others perform Services.
- 26. NO WAIVER: No waiver by either party of any default by the other party in the performance of any provision of this Agreement shall operate as or be construed as a waiver of any future default, whether like or different in character.
- 27. LAW TO APPLY: The validity, interpretation, and performance of this Agreement shall be governed by and construed in accordance with the laws of the state where project is located.
- 28. TIME BAR: Not withstanding any applicable state statute of repose or statute of limitation, the Parties agree that all legal actions by either party against the other concerning this Agreement or the work performed in relation to this Agreement, will become barred two (2) years from the time the party knew or should have known of the claim, or one year after completion of Consultant's services, whichever occurs earlier.

CONSULTANT HEREBY ADVISES CLIENT THAT ITS PERFORMANCE OF THIS AGREEMENT IS EXPRESSLY CONDITIONED ON CLIENT'S ASSENT TO THE TERMS AND CONDITIONS DETAILED HEREIN.

ENTIRE AGREEMENT – This Agreement represents the entire understanding and agreement between the parties hereto relating to the Services and supersedes any and all prior negotiations, discussions, and Agreements, whether written or oral, between the parties regarding same.

TO THE EXTENT that any additional or different Provisions conflict with the Provisions of this Agreement, the Provisions of this Agreement shall govern. No amendment or modification to this Agreement or any waiver of any provisions hereof shall be effective unless in writing, signed by both Parties.

IN WITNESS WHEREOF, the Parties have caused this Agreeme	ent to be executed by their duly authorized representative.

## **APPENDIX VII**

RESUMES OF ENVIRONMENTAL PROFESSIONALS

## **Project Role:**

**Environmental Scientist** 

## Company:

S&ME, Inc.- Knoxville, TN

#### **Education:**

B.A. Education, 1980 Concordia College, Illinois

## **Years of Experience:**

Joined S&ME in 1994 with eight years of previous experience

#### **Professional Certifications:**

EPA Certified Asbestos Inspector #7ME03177501IR017

## **Continuing Education:**

- 40-Hour Health and Safety Training
- Hazardous Waste Operations Supervisor Training
- Asbestos Inspectors Course
- Conducting Historical Research According to ASTM Standard E1527-94
- Whole Effluent Toxicity Testing Short Course
- Environmental Site Assessments for Commercial Real Estate, ASTM
- Permit Required Confined Spaces Course
- Project Management and Professional Development

# TIMOTHY S. SCHALK ENVIRONMENTAL SCIENTIST

Mr. Schalk has performed hundreds of Phase I Environmental Site Assessments (ESAs) using the American Society for Testing and Materials (ASTM) standard. His Phase I work has been for both public and private sector clients and includes projects for commercial realtors and developers, and industrial clients in Tennessee. Mr. Schalk's environmental areas of expertise include: soil and groundwater quality assessments for active and inactive sites; Underground Storage Tank (UST) removals and assessments, Phase I Environmental Site Assessments to define past usage of property and determine the presence of potential environmental liabilities. aquatic toxicity testing of municipal wastewater discharges.

#### KEY PROJECTS AND ASSIGNMENTS

### UST removal and site closure at a hospital in Tennessee.

Project Manager responsible for supervision of tank removal, soil and groundwater sampling and analysis, and state regulatory interfacing.

# Phase I Environmental Site Assessments of Railroad Trackage in Tennessee, Kentucky, Georgia, Alabama, Mississippi, and Florida.

Project Manager for several Phase I ESAs. Tasks included site reconnaissances, state regulatory interfacing, and interpretation of state and federal regulatory information.

## Numerous Phase I Environmental Site Assessments throughout middle and east Tennessee, Kentucky, Georgia, South Carolina, Mississippi, Kansas, and West Virginia.

Project Manager for Phase I ESAs. Clients included Flagstar Enterprises, Wal-Mart, the Loewen Group, Gulf and Ohio Railways, various developers, real estate agents, and private individuals.

## **Asbestos and Lead Paint Assessment**

Project Manager for assessment of asbestos and lead based paint in buildings being acquired by health care facility. Residence and outbuildings assessed for asbestos and lead-based paint to allow for demolition, removal, and proper disposal of building materials. Assessment performed according to NESHAP standards.

#### UST removal and site closure in Alabama.

Project Manager for removal of underground storage tank, and subsequent site closure. Activities included supervision of tank removals, soil and groundwater sampling and analysis, and state regulatory interfacing.

# Bioremediation of a Solvent Spill at a Manufacturing Facility in Little Rock, Arkansas.

Project Manager responsible for contaminated soil removal, aeration, and testing until contaminants were reduced to below detection limits. Interfaced with state regulatory authorities during remediation activities.

# Phase I Environmental Site Assessment of a 200,000 square foot Manufacturing Facility in Georgia.

Project Manager for Phase I ESA. Assessment included UST and AST assessments, asbestos inspection, and regulatory investigation utilizing established S&ME Protocols based on American Society for Testing and Materials (ASTM) Phase I Environmental Site Assessment Process Document 1527-97.

# Database Manager for U.S. Air Force Underground Storage Tank (UST) Program.

Maintained database of USTs at 12 Air Force bases throughout the country. Utilized UST information to determine removal or upgrade requirements. Generated cost proposals for UST work performed at each base.

## **Project Role:**

Senior Geologist

### Company:

B.S. Geology, Tennessee Technological University, 1987

## Years of Experience:

Joined S&ME in 2001 with 13 years of previous experience

### **Professional Registrations:**

Professional Geologist:

- Tennessee (#1802)
- Kentucky (#881)
- North Carolina (#1717)
- Georgia (#1572)

Kentucky Corrective Action Contractor Certification (#1143)

#### **Professional Memberships:**

- National Groundwater Association
- Geological Society of America

# ERIC M. SOLT, P.G. ENVIRONMENTAL SERVICES DEPARTMENT MANAGER

Mr. Solt is a Senior Geologist and Manager of the Environmental Services Department in S&ME's Knoxville office. His areas of proficiency include: project management, operations management, Phase I Environmental Site Assessments, Phase II Environmental Site Assessments, solid and hazardous waste evaluation and management, geologic investigations, soil and groundwater remediation system design, remediation construction management, remediation operation and maintenance.

#### KEY PROJECTS AND ASSIGNMENTS

#### Pilot Oil Corporation and Pilot Travel Centers, LLC

(various southeast locations)

Project Manager for Phase I and Phase II pre-purchase due diligence environmental services. Responsibilities include contract management, development and implementation of site assessment plans. Property assessments include environmental and geotechnical evaluation of developed and undeveloped parcels.

## **Former Industrial Complex**

#### Elizabethton, Tennessee

Project Geologist for Phase II Environmental Site Assessment for site development. Project included review of historic facility operations and environmental compliance issues, assessment design, subsurface investigation and reporting.

## **Blount County Highway Department**

#### Alcoa, Tennessee

Project Manager for facility investigation that included the assessment of soil and groundwater and delineation of old municipal landfill cells on site. Used historic aerial photographs and differential global positioning system and test pit confirmation to expedite the landfill area delineation. Environmental assessment information was used to negotiate a Brownfield Agreement.

## **Former Zintec Metal Finishing Facility**

#### Knoxville, Tennessee

Project Manager for pre-purchase due diligence investigation that included Phase I ESA and limited Phase II Geoprobe shallow soil assessment for metals.

## **Former Injection Molding Facility**

## Blount County, Tennessee

Project Manager responsible for facility assessment to determine the extent of migration of hydraulic oils beneath the process area floor slabs. Assessment also included air rotary drilling to evaluate site groundwater.

ERIC M. SOLT, P.G. SENIOR GEOLOGIST PAGE - 4 -

# **♦S&ME**

## **Continuing Education:**

- Stream Restoration and Natural Channel Design, 2004
- ASTM E1527 Environmental Site Assessment for Commercial Real Estate training, 2003-2008
- Natural Attenuation for Site Remediation, 1998
- Groundwater Pollution and Hydrology, 1994
- Bio-Venting, Principles and Applications, 1994
- Air Sparging for Site Remediation, 1994
- 40-Hour Hazardous Waste Operations Training, 1993 and annual 8-Hour refresher courses 1994-2008

## **Former Lay Packing Facility**

#### Knoxville, Tennessee

Project Manager for Phase II Environmental Site Assessment and the sampling and in-place closure of two 20,000 gallon fuel oil heating tanks.

#### Former Brookside Mills Site

#### Knoxville Tennessee

Project Manager for the subsurface evaluation of a historic knitting mill. Assessment included the identification of relevant sampling points using Sanborn maps, historic aerial photographs and differential global positioning system.

## **Former Metal Fabrication Facility**

#### Knoxville, Tennessee

Project Manager for Phase II Environmental Site Assessment of a former large-scale metal fabrication facility. Assessment also included test pit and drilling evaluation of a coal tar disposal area associated with historic gas light production facility.

#### **Anniston Army Depot**

#### Anniston, Alabama

Project Manager for free product recovery system evaluation using mobile enhanced multi-phase extraction to determine aquifer parameters and free product production at various vacuum and flow rates.

#### **Proposed Municipal Service Center**

#### Aloca, Tennessee

Project Manager for Phase II Environmental Assessment of a former manufacturing facility with historic municipal landfill cells located on the property. Utilized test pit, soil boring and Geoprobe<sup>®</sup> investigation techniques to document subsurface soil conditions and define boundaries of landfill cells relative to proposed structures. Environmental services relative to the development also included a methane and landfill cover thickness evaluation, a hazardous materials survey in the powerhouse, production and drying kiln buildings, as well as a wetlands evaluation.

#### **Aluminum Manufacturing Facility**

#### Blount County, Tennessee

Project Manager for comprehensive building material inventory at multiple facilities that included the identification, sampling, analysis and labeling of all identified asbestos-containing materials.

### **Former Plasti-Line Facility**

#### Knoxville, Tennessee

Project Manager for pre-purchase due diligence Phase I and Phase II Environmental Site Assessment of a former thermoplastic molding facility.
